I love our XM Satalite radio for many reasons. One of the best features is to get instand traffic and weather 24/7. This helps us in navigating the traffic in the NY area and keeps us up to date on accidents, bottlenecks and other road hazards. Also the ability to have the weather available all the time is a great feature. We are happy to pay the monthly fee to get these services and other music and entertainment. We have this installed in 2 cars and a motorcycle.

I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.
